

## At Vision, being green is not a trend but a way of life.

The Vision Integrated Graphics Group is pleased to announce that we have been certified to Forest Stewardship Council (FSC) chain-of-custody standards as part of our commitment to responsible forest management.

While the recognition is nice to have, our commitment to conservation isn't new. We've actually been exceeding the state's standard for compliance since 1998 when we were awarded the designation of Illinois Best Printers for our voluntary pollution reduction programs.

At Vision, we have always believed in the importance and impact of environmentally sound business practices because we want to be part of the solution – not the problem. You can be certain we will continue working hard to be in complete compliance with Illinois' regulations for air, land and water conservation.

Additionally, we are pleased to be able to extend our certification to the many customers we serve, so you can proudly display the FSC logo on your materials and show the world you're making a difference, too.

For more information on what our FSC Certification could mean for you, please contact your Vision Sales Representative.

### What is FSC?

*The Forest Stewardship Council (FSC) is an international network to promote responsible management of the world's forests. The FSC logo identifies products which contain wood from well-managed forests certified in accordance with the rules of the FSC, which ensure that people, wildlife and the environment benefit from the forestry practices. FSC certification is globally recognized as being the most credible and strongest system for ensuring well-managed forests.*

*Independent certification organizations are accredited by FSC to carry out assessments of forest management to determine if standards have been met. These certifiers also verify that companies claiming to sell FSC certified products have tracked their supply back to FSC certified sources.*
